

## FOR IMMEDIATE RELEASE

### SMART INNOVATION CORPORATION, A NEWLY FORMED NON-PROFIT AI COMPANY, EMBARKS ON PROMOTING RESPONSIBLE AI FOR THE PUBLIC SECTOR

**WASHINGTON, D.C. METRO AREA** (November 8, 2025) – We are pleased to announce the launch of the Smart Innovation Corporation, a non-profit AI-focused company dedicated to promoting **Responsible AI** implementation in the public sector. See: [www.smartinnovationcorp.org](http://www.smartinnovationcorp.org) for more details.

Co-founded by Dr. Indu B. Singh and Dr. Marianne Meins, Smart Innovation Corporation (SIC) is based in Northern Virginia and will operate at the national level. “More specifically, this new corporation is committed to strongly encouraging the implementation of **Responsible AI** in the public sector, driving **innovations in AI**, and developing critically-needed **AI workforces** in key markets, while also managing the **AI Innovation Hub** and the **Collaborative Venture Studio**,” said Dr. Singh, Managing Director and AI CTO.

The Corporation will promote **Public-Private Partnerships (P3)** in all of its activities. “We will focus on advancing the responsible development and use of Artificial Intelligence as a force for social good in order to drive innovations that empower communities, encourage fairness for all, and create AI solutions to global challenges that are resilient over time,” added Dr. Michael G. Oehler, Director of Communications and AI Training Coordinator.

Bill Yarnoff, Senior Advisor for AI Workforce Development, also emphasized that SIC’s vision is, “to harness the power of AI-powered technologies so as to create an inclusive, innovative, and sustainable future where every community and their respective organizations and residents can thrive.”

Smart Innovation Corporation will additionally be providing multiple, high-demand services nationwide to its customers and partners. “Through our two unique and focused entities: the **AI Innovation Hub** and the **Collaborative Venture Studio**, we will promote **Responsible AI** innovation and implementation as well as utilize the **Venture Studio** to build-up new AI-tech startups and emerging small businesses. We will further be actively involved in **AI workforce development** efforts along with providing **AI consulting and implementation services**,” stated Randy Reade, Director of the Collaborative AI Venture Studio.

Holt Evans, Director of AI Program Development, summarized all of the above by noting, “Smart Innovation Corporation is a new nonprofit organization dedicated to advancing **Responsible AI** leadership in public-sector and community settings. **Through an innovation hub, a venture studio, workforce-development initiatives and consulting partnerships, the organization will strongly support governments, communities, institutions and citizens in efficiently deploying appropriate and effective AI solutions to real world problems.** By building multi-stakeholder collaborations and nurturing an AI-ready workforce, SIC will energize countless US organizations, groups and residents to prosper in a tech-enabled future.”
